

N - T Y P E B A L L O O N S

N - Type *the ultimate advertising balloon*

The smooth surface of the N-Type is constructed from 24 gores of colourful rip-stop nylon (32 gores with sizes N-145 and above) which are then halved vertically into 48/64 almost flat facets to carry even the most complicated artwork with maximum visibility.

Designed by computer to a natural mathematical form which gives zero horizontal fabric stress, the loads are carried by multiple, closely spaced, vertical tapes.

A beautiful and elegant shape built to the most exacting standards and sold with a written guarantee, N-types have been chosen for promotional use by major companies world-wide as well as by many smaller businesses involved in retailing, distribution, manufacturing and the provision of services on a national, regional and local level.

Fabric resistant to fungal attack and fading is standard while Hyperlast, silicone coated on both sides and which can increase envelope life by up to 50%, is optional.

Envelope deflation is via a standard parachute. Alternatively we can fit our RDS rapid deflation system or the no-cost Lock Top.

Model designation: N

Sizes (000 ft³/m³)

N-31	(31/890)
N-42	(42/1190)
N-56	(56/1590)
N-65	(65/1840)

Accessories:	Full range

A colouring chart for this model can be found in the envelopes section at www.cameronballoons.co.uk

Specifications are subject to change without notice.

A comprehensive range of baskets is available with the N-type. Construction is from cane and willow or all cane in elegant natural shades and with coloured banding to your specification as an option. Suede trim is standard with leather as an alternative, again with a wide colour range.

The ultra-quiet Stealth is a popular choice of burner and is often specified in combination with the pencil slim Shadow.

Inflation fans, radios, instruments, tethering equipment and trailers - in fact all the accessories you might want to complement your N-Type balloon - are also available.
